### FEBRUARY 2021
**Understanding and overcoming mechanisms of tumour resistance**
GUEST EDITOR: Brent A Hanks, William Dalton Family Assistant Professor of Medical Oncology; Assistant Professor, Department of Pharmacology and Cancer Biology; Associate Director of Basic and Translational Research, Duke Center for Cancer Immunotherapy, Duke University, Duke Cancer Institute

**Assessing the prospects of various methods to model and modify the tumour microenvironment**

---

### APRIL 2021
**Modelling the I-O manufacturing facilities of tomorrow**
GUEST EDITOR: John Lunger, Chief Patient Supply Officer, Adaptimmune

How to increase their efficiency, flexibility and productivity in line with expected future trends in supply and demand?

---

### JUNE 2021
**Hunting for better biomarkers of response**

Where is real progress being made in understanding why patients do and don't respond to I-O therapeutics?

---

### JULY 2021
**Enhancing preclinical predictivity**
GUEST EDITOR: Dr Christian Schmees, Head of Tumor Biology, NMI Natural and Medical Sciences Institute at the University of Tuebingen, Germany

What is going wrong between preclinical in vitro/in vivo and clinical in vivo settings?

---

### SEPTEMBER 2021
**Leveraging cutting edge tools to convert I-O data into knowledge**
GUEST EDITOR: Jacques Molisan, PhD, Translational Innovation Platform - Immuno-Oncology Scientific Site Head (USA), EMD Serono Research and Development Institute

How recent advances in bioinformatics and other technological innovation are driving the future of I-O discovery and development in process and product robustness

---

### NOVEMBER 2021
**Bioprocessing/CMC trends, tools and techniques**
GUEST EDITOR: Anurag Khetan, Senior Director, Global Cell Line Development and Omics, Bristol-Myers Squibb

How next-gen biopharma manufacturing solutions will drive the required improvements

---

### DECEMBER 2021
**TBD**

---

**Each spotlight will comprise:**
- Peer-reviewed Reviews and Expert Insight articles written by leading experts in the field
- Webinars, featuring industry speakers and sponsors discussing key topics specific to the Spotlight
- Podcast, written and video interviews with key opinion leaders
- On demand roundtable discussions

**Immuno-Oncology Insights’ spotlights provide you with fantastic opportunities to:**
- Educate your target market about your company’s expertise, capabilities and experience
- Share your latest data with organisations looking for partners and service providers in your field
- Profile your executives and scientists as thought-leaders and KOLs
- Generate qualified leads from across the global sector
- Increase awareness of your company’s role in cell and gene therapy R&D and manufacture.
